RE: Caithness Public Hearing

Dear Supervisor Romaine,

I am writing to you as a resident of the Village of Port Jefferson about the vote on the downsized Caithness II plant. I encourage you to please vote "NO" on the application before you. Allowing the plant to downsize to a 600 MW plant will enable Caithness II to be built on speculation in complete contradiction to the forecast for energy supply on Long Island.

Enabling Caithness II to be built in any way, will cause direct, irreparable harm to the Village of Port Jefferson, our Fire Department, Library and Schools. It will make any possibility of repowering our site in 2025 more unlikely.

Furthermore, Long Island has been focusing on green renewable energy's such as wind and solar farms, so helping to advance the initiative of a large gas-fired plant is UNNECESSARY and IRRESPONSIBLE!

Supervisor, you must vote no. You have an obligation to protect us, support us, and at the very least not put a speculator in front of your constituents.

There is NO PROOF we need MORE energy on Long Island. Giving Caithness II any opportunity to advance its plant on pure speculation is just irresponsible and wrong.

PLEASE! You must vote NO!!!

Signed,
