12. **AFFIDAVIT** - After the applicant has mailed the notification letters and posted the PUBLIC NOTICE signs on the property, the applicant shall submit an Affidavit of Notification and Posting with attached photograph of posted sign and proof of mailing to the Building Department. A copy of this Affidavit is enclosed within this package.
SUGGESTED GUIDELINES FOR VARIANCES

One of the basic powers given by law to a Zoning Board of Appeals is called the “Variance” power. The Board has the authority to “vary” or modify the strict letter of a zoning ordinance or local law in cases where the benefit to the applicant outweighs the benefit to the neighborhood.

Appeals Boards are frequently confronted with requests for variances. There are two types of requests that come before the Board and the standards by which they are judged differ. A use variance is a request to utilize property for a use or activity, which is not permitted by the zoning ordinance and the applicant, must demonstrate “unnecessary hardship”. An area variance is a request for relief from the dimensional standards contained in the zoning ordinance and takes into consideration the benefit to the applicant weighed against the detriment to the health, safety and welfare of the neighborhood.

USE VARIANCE

An individual who wants to utilize property for a use that is not permitted by the zoning ordinance must apply for a use variance. An application for a use variance must demonstrate unnecessary hardship by satisfying each of the following four tests:

1. **Uniqueness** – The applicant must prove that there are certain features or conditions of the property that are not generally applicable throughout the zone and that these features make it impossible to earn a reasonable return without some adjustment. If the features or conditions are generally applicable throughout the district, a variance should not be granted. In those situations where others share the difficulty, the relief should be accomplished by an amendment to the zoning ordinance, not a variance.

2. **Reasonable Return** – The applicant must demonstrate an inability to realize a reasonable return under any of the uses permitted in the zoning ordinance. There must be a “dollar and cents” proof of the applicant’s inability to realize reasonable return; speculation of qualitative assessment is inadequate. Failure to realize the highest return is not considered a hardship.

3. **Character** – The applicant must prove that the requested modification will not change the character or quality of the neighborhood. In addition, the “spirit” of the ordinance or local law should be preserved.

4. **Self-Created Hardship** – The applicant must prove that the alleged hardship is not self-created.

The applicant for a use variance must meet all four tests before an Appeals Board may grant relief. A use variance should not be granted if the applicant created the “unnecessary hardship”. If the Appeals Board grants a use variance to an applicant who has failed to meet each of the tests, it runs the risk of assuming the function of the legislative body and making a decision contrary to the legislative intent of the zoning ordinance.
AREA VARIANCE

The Zoning Board of Appeals shall have the power, upon an appeal from a decision of the administrative official charged with the enforcement of such ordinance or local law, to grant area variances as defined herein.

Village Law § 7-712(1) provide as follows:

“’area variance’ shall mean the authorization by the zoning board of appeals for the use of land in a manner which is not allowed by the dimensional or physical requirements of the applicable zoning regulations”

In making its determination, the Zoning Board of Appeals shall take into consideration the benefit to the applicant if the variance is granted, as weighed against the detriment to the health, safety, and welfare of the neighborhood or community by such grant. In making such determination, the Board shall also consider:

1. The granting of the area variance will create whether an undesirable change will be produced in the character of the neighborhood or a detriment to nearby properties.
2. Whether the benefit sought by the applicant can be achieved by some other method, feasible for the applicant to pursue, other than an area variance.
3. Whether the requested area variance is substantial.
4. Whether the proposed variance will have an adverse effect or impact on the physical or environmental conditions in the neighborhood or district.
5. Whether the alleged difficulty was self-created, which consideration shall be relevant to the decision of the Board of Appeals, but shall not preclude the granting of an area variance.

IT WOULD BEHOOVE THE APPLICANT TO CAREFULLY CONSIDER THE TESTS LISTED AND BE PREPARED ON THE HEARING DATE TO OFFER TESTIMONY BASED ON AN UNDERSTANDING OF THE ABOVE CRITERIA.

The Appeals Board should grant the minimum relief necessary to allow reasonable use of the property in question. An applicant is not automatically entitled to receive relief.

SUMMARY

The major difference between a use variance and an area variance involves the use of the property. An area variance results in the modification of physical restrictions so that an allowable use may be established on the property. By contrast, a use variance permits the establishment of a use that is prohibited by the zoning ordinance and the zoning map.
